Early Vision (IV) Introduction to Computational and Biological Vision CS 202-1-5261 Computer Science Department, BGU Ohad Ben-Shahar Edge detection methods Edge detection via local surface fitting General idea: 1. Think of the discrete image $I(i,j)$ as a set of samples of a continuous image $I(x,y)$. 2. For each $q=(i,j)$, fit (via linear least squares) a predefined parametric model to $I(i,j)$ in the nei...

WHAT IS TECHSPEC illumination? Conventional diffuse backlights are often used in manufacturing environments, where applications demand that objects be inspected and measured. Often, the profile of an opaque object can be checked for size, irregularities, or defects simply by passing it front of a backlight and processing the image with a vision system. However, as the required measurement accurac...
